

The syllabus for “LAH.C620: Glocal Doctor Japan Y2”

Course description and aims

The aim of this course is to create the forum which facilitates knowledge exchange among doctoral course students, students in master program and graduate students of other university etc. Students will learn the trends of advanced and interdisciplinary research and how to collaborate with diverse fields of scholars.

This course will develop students' ability to:

- (1) Address social issues with their expertise;
- (2) Collaborate with members from diverse background;
- (3) Understand research ethics and codes of conducts for researchers;
- (4) Create intellectual exchange opportunities;

Then, this course hopes to create and expand human network, centered on doctoral students, in Tokyo Tech.

Student learning outcomes

At the end of this course, students will be able to:

- 1) conduct advanced and interdisciplinary studies.
- 2) take group work and communicate with students with different fields and foreign students also in English.
- 3) present the results of their group-work in the postal presentation style.
- 4) acquire leadership, ability to conduct interdisciplinary research, and communication skills.
- 5) address social issues with their expertise;
- 6) collaborate with members from diverse background;
- 7) understand research ethics and codes of conducts for researchers;
- 8) create intellectual exchange opportunities;
- 9) contribute to create and expand human network, centered on doctoral students, in Tokyo Tech.

Keywords
